

i-Farm Basics continued...

i-F.A.R.M. Main Page

Below is an indication of the i-F.A.R.M. main page and general interface.

Apply Filter: Applies selected filter conditions.

Reset Filter: Puts all search options back to program defaults.

Filter window: Helps locate Growers-Farms-Field using specific search data.

Farms: Checking this allows Farm/Field info to be visible in the drop-down Customer index.

Reduction tabs: Collapse Search Filter and Customer Index windows.

i-F.A.R.M. function tabs: Each tab is addressed in its own module.

Base Layer options: Clicking this tab allows different backgrounds and viewing options.

Customer Index / Tree. Drop-down Division-Location-Grower-Farm-Field index.

Map Display Area

Account Window. Grower-Farm-Field drop location. Drag wanted files to this area to display fields.
